LP-SG12822FP 12 ports Switch, with 8x10/100/1000Mbps PoE ports plus 2x10/100/1000Mbps Uplink ports + 2 SFP fiber ports.

The PoE Switch is independently innovated, researched and developed, specially designed for satisfying needs of PoE. It adopts the newest high speed Ethernet exchange chips and ultra-high switch capability, has the capability of extreme speed data processing, improves the performance of smooth data transmission. Complied with IEEE802.3af/at (active PoE Switch) for the port and can be up to 30W for single port. Automatically detect and identify the powered device which comply with IEEE802.3af/at, and priority-mechanism supply power by the cable.

PoE (Power over Ethernet), Ethernet power supply, it can transmit data and signal for some IP-based terminals (e.g. IP Phone, Wireless AP, Networking Surveillance Camera and etc.), and at the same time, it can supply DC power for these devices, It is called PD (Powered Device) which can accept the DC power supply.
